ABSTRACT

Documentation is provided to aid users of a file that contains data on financial aid and school costs for a sample of students in the 1985-86 school year. Each record contains information from the school registrar's office, from the student financial aid office record, and from a questionnaire completed by students. There are 3,774 records on the Statistical Analysis System (SAS) file, composed of 3,774 registrar records, 1,830 financial aid records, and 2,282 survey questionnaires returned from students. Approximately 43% of all students attending postsecondary schools received financial aid, and 33% received Federal aid. The documentation includes: (1) the survey summary; (2) the file description; (3) some user notes; (4) weighted population figures; (5) lists of variables by position and alphabetic order; (6) the registrar's office record form; (7) the Student Questionnaire; (8) the Student Financial Aid Record; and (9) additional information on weighted responses. PART I - SURVEY SUMMARY

A. TITLE

National Postsecondary Student Aid Field Test 1985-86

B. DESCRIPTION

This survey collected data on Financial Aid and School Costs on a sample of students in the 1985-86 school year. Each record contains information from the student's school registrar's office records, student financial aid office record and student questionnaire.

C. SURVEY METHODOLOGY

1. UNIVERSE OR SAMPLE	2. RESPONDENTS

USER NOTES

In selecting the student sample, a three stage process was used. All identified postsecondary institutions in the 50 States and D.C. were divided into geographic clusters based on contiguous zip codes. Of these 360 clusters, 31 were selected from which the institutional sample was drawn. To draw the sample of institutions, institutions were stratified by level (4-year, 2-year, and less-than-2-year) and control (public, private-non-profit, and private-for-profit) and selected from within these strata. An initial sample of 130 eligible institutions was identified. Of these, 12 refused to participate, yielding an institutional response rate of 97.3%. Students in each participating institution were selected randomly from the institution's list of enrollees. A tabular description of the student population that was sampled for the field test is available in Table 1.

For items that were common to more than one data collection form and critical to data analysis, composite variables were created to minimize item nonoresponse. These items included dependency status, type and source of financial aid received, amount of aid, and total cost of attending a postsecondary institution. The composite measures were developed using the following procedures.

A student was identified as a participant in some financial aid program if any one of the following conditions held: (1) the student had a financial aid record with some information indicating receipt of any financial aid; (2) the student responded on the student questionnaire that he or she had, or expected to receive, financial aid from any source other than family, other relatives, or friends for the 1985-86 school year; or (3) if the student listed any sources or amounts of aid as being received for the 1985-86 school year.

A similar set of conditions was established to identify recipients of Federal financial aid and non-Federal aid, regardless of type, and for recipients of various types of aid (e.g., grant or loan), regardless of source. It should also be noted that college work-study programs were considered financial aid, but student work outside of formal work-study programs was not considered financial aid - even though student earnings were part of a complete financial aid package. The general rule in developing these measures of participation was to use the financial aid office records, if such records existed, because they were considered to be more accurate and reliable. If financial aid records were unavailable, responses to the student questionnaire were used.

1/ CV% is a measure of the proportion of the estimate due to the sampling variability.

2/ Full-time undergraduates are those who were enrolled for 12 or more semester credit hours or 24 or more contact hours per week.

3/ Part-time undergraduates are those who were enrolled for 12 or more semester credit hours or less than 24 contact hours per week.

4/ Full eligible undergraduates are those who were enrolled in 6 or more semester credit hours.

Source: National Postsecondary Student Aid Study Field Test, school year 1985-86.

The following lists the variables of the National Postsecondary Student Aid Study Field Test SAS file by position and alphabetic order. There are 3,774 observations with 389 variables on this file. Each observation contains variables from three different data collection forms. They are as follows:

1. The Registrar's Record Form
2. The Financial aid office record form
3. Student Questionnaire

Variables #6 thru #336 (see contents of SAS Data file) are variables that were collected from one of the above forms. The first character in the variable name denotes which form the variable refers to. For example:

R12B refers to question 12 Part B on the Registrar's form
F12 refers to Question 12 on the Financial Aid Office form
SQ11 refers to Question 11 on the Student Questionnaire

Variables #337 thru #389 are composite variables of key items common on more than one data collection form and critical to data analysis. These items included dependency status, student level, type and source of Financial aid received, amount of aid, and total cost of attending a postsecondary institution.

Refer to the attached code book to get the values for all categorical variables and ranges of values for other variables.

There are two weights on the file. Student weight #1 should be used to weight the registrar record items and financial aid office records items to population totals. Student weight #2 takes into account non-response on the student questionnaire and should be used to weight student questionnaire items to population totals. For the composite variables, the following weights should be applied:

Variable Name	Varible Label	Weight
Depend	dependency status	student weight 2
RLevel	student level	student weight 1
AIDT, AIDF, AIDS, AIDG, AIDI, AIDO, etc.	type and source of financial aid	student weight 1
F18, Federal, State, Institute	amount of aid	student weight 1
TScost, Cost, Cost1, Cost2, Cost3	Total cost of attendance	student weight 2

National Postsecondary Student Aid Study

Student Questionnaire

Dear Participant:

Thank you for participating in the National Postsecondary Student Aid Study, the first comprehensive survey ever attempted to find out how and how much you are paying for your education after high school. Your completion of this questionnaire will provide valuable information that will help to improve the design and operation of Federal student aid programs for future students.

All information which would permit identification of individuals or families will be strictly confidential to the extent permissible by law, will be used only for the purposes of the survey, and will not be disclosed or released to your school or to any other group or individual. All information obtained by the survey is authorized by law (20 U.S.C., 1221e-1). While you are not required to respond, your cooperation is crucial to make the results of this survey comprehensive, accurate, and timely.

If you need assistance filling out the questionnaire please call (800) 544-7755. Thank you in advance for your cooperation.

GENERAL INSTRUCTIONS

1. There are three types of questions asked in this questionnaire. Please follow the instructions given below for each type.

   a. The first type of question requires that you write in an answer in the space provided.

      Example: What was your major field of study for your degree ?
      Sociology

      Please estimate your total cost for books and supplies.

      $ 200.00

   b. The second type of question lists the possible answers and you are asked to circle only one answer code.

      Example: Did you go to a movie last week?

      YES. . . . . (1)
      NO 2

   c. The third type of question lists the possible answers and you are asked to circle all answer codes that apply.

      Example: Last week, did you do any of the following?

      CIRCLE ALL THAT APPLY

      See a play . . . . . (1)
      Go to a movie . . . . . (2)
      Attend a sporting event 3

2. Please answer all questions in the order they appear on the questionnaire unless instructed otherwise. For some questions, the answer you circle will determine if you should answer the next question or skip it. The instructions to skip to another question are given in parentheses next to the answer code. If an answer code you circle has no instruction next to it, continue with the next question.

   Example: Were you enrolled in a college or university during the period of January-February 1985?

   CIRCLE ONE CODE ONLY

   YES: FULL-TIME . . . . . (1)
   YES: PART-TIME 2
   NO . . . . . 3 (SKIP TO Q10)

   In the above example, if you circled code 1 or 2 (YES: FULL-TIME or YES: PART-TIME), you would go on to the next question. If you circled code 3 (NO), you would skip to question 10.

PLEASE READ EACH QUESTION CAREFULLY AND START WITH QUESTION 1.
